Big River Festival Presents - BIG Family Fun

by: Kevin J. Meneau, Fisheries Mgmt. Biologist

The Big River Festival will be an outstanding family event that provides the proverbial

family event that provides the proverbial "something for everyone." Event features include entertainment on two stages, lots of food, live animals, games, crafts, and period re-enactments.

Just the facts:

What: Big River Festival
Where: Washington State Park
When: June 2 (10AM-6PM) and
June 3 (10AM-4PM)

June 3 (TOAIVI-41

Admission: Free

There will be plenty of animals! Glenn Chambers will be showing off his river otters. A 3,200-gallon mobile aquarium will show Big River fish. Many types of raptors will be displayed by The World Bird Sanctuary. The St. Louis Herpetological Society will provide hands-on displays of turtles and snakes. Drop by the Stream Team booth to see what's crawling along the bottom of Big River. Learn about Ozark plants and animals from experts.

There will be plenty of hands-on activities! Help plant a bottomland forest, next to Big River. Challenge yourself by walking through fish and waterfowl identification mazes. Kids can try their luck with the natural resources treasure hunt or games. Learn how to fly fish or cast bass lures. Try your skill at the archery range. Help Stream Teamers sample for Big River insects and its water quality.

There will be plenty of cultural and natural history! Learn about Native American life in the Ozarks. Big River has a rich mining history – learn about its promise and problems. Learn all about glades and glade restoration. See a portable Ozark sawmill and a model of an Ozark stream in operation. Observe crafters weave, whittle, and sew.

There will be plenty of entertainment! Two stages will host a variety of music and entertainment. You'll be amazed by Ralph Duren's expert wildlife calling. The Fishin' Magicians combine straight fishin' with real magic. Four bands are booked and ready

to play folk, country, and bluegrass music. A live radio remote will be present. There will be plenty of food! Enjoy a variety of foods and beverages consumed by Native Americans, trappers, and settlers. There will be plenty available, so no coolers or alcohol please.

The Big River Festival is easy to find and is located in Washington State Park, off Highway 21, just southwest of Desoto, Missouri. Follow the banners and signs to the Big River and look for the information booth to pick-up a brochure and map.

The Big River festival is a free event, sponsored by Missouri Department of Natural Resources, Missouri Department of Conservation, and Missouri Stream Team. It's intended to highlight the river and its watershed's cultural, historical, recreational, and natural resources. Come and join the fun at the Big River Festival. We'll see you along the River!

WANTED: VOLUNTEER NATURALISTS!

Would you like to learn more about the natural world while helping to promote a greater understanding of Missouri's resources and their conservation? Consider becoming a Volunteer Naturalist for the Missouri Department of Conservation.

Busch Conservation Area, Powder Valley Conservation Nature Center, and Rockwoods Reservation are looking for folks who are interested in becoming Volunteer Naturalists. Beginning this September, the three sites will be working together to present the introductory training course for Volunteer Naturalists. This 7-session course will be held during the months of September, October and November.

See back page for details

Powder Valley Conservation Nature Center

Lewis & Clark's "Corps of Discovery"

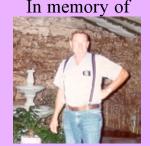

In a secret memo to Congress in 1802, Thomas Jefferson asked for authorization to explore the Missouri River to its possible source at the Pacific Ocean. During this expedition the small "corps of men" would develop friendly relations with the natives and map this previously uncharted land. Congress authorized an initial expenditure of \$2500.00 to pay for such an exploration. In a 1803 letter to Captain Meriwether Lewis, President Jefferson stated, "In the journey which you are about to undertake for the discovery of the course and source of the Missouri..." Lewis was further authorized to select 12 soldiers and additional men as necessary. The funds for the expedition would be provided by the War Department.

Captain Lewis's passport identified him as a "Citizen of the United States who, by authority of the President . . . is setting out on a voyage of discovery . . . "

Thus with the "corps" of up to 30 men and the mission of "discovery" from Jefferson was born the Lewis and Clark Expedition of "The Corps of Discovery."

Powder Valley has added to its collector series pins honoring the "Corps of Discovery." The pins are \$3.00 each and are available in our gift shop.

March 10, 2001

RONALD P. LANE

Ron, an early riser, helped make Powder Valley Nature Center ready for the new day. Ron came to work at 4:00 a.m. and made sure that the birds were fed, vehicles fueled and coffee on before other staff arrived. On cold days, Ron always made a point to have a roaring fire ready so staff and visitors could take advantage of the cozy warmth while viewing winter outside. The bird feeding area was tops on Ron's list, for he loved the birds and turkey, but mostly he enjoyed watching the deer. We will all miss seeing Ron on the tractor, he loved being able to help with projects that required his expertise on heavy equipment. Ron made friends easily and will be missed by all.

(Reservations begin April 24)

News from

Rockwoods Reservation

Do April showers really bring May flowers? This month there is an explosion of flowers in bloom in gardens, conservation areas, parks and even roadsides. Cheerful colors and wonderful scents make this month beautiful and fragrant.

Flowers are feasts for more than the eyes. Flowers contain pollen, that yellow dust you get on the tip of your nose if you sniff too closely. The tiny pollen grains are necessary for plant survival! To reproduce, many plants must get pollen from another plant of the same kind. But pollen can't walk, run, crawl, or fly! To get birds and insects to carry pollen for them, flowers "bribe" them with food. Pollen itself is a nutritious food, but luckily for the flowers, pollen grains make for messy eating. After a pollen meal, insects and birds usually leave a flower with pollen stuck to their heads and legs. This pollen is transferred to another flower when the animal moves on for its next meal.

Some flowers produce nectar to attract pollinators. While the animal is licking or sucking up the sugary liquid, it picks up pollen grains. The pollen hitches a free ride to the next flower. Many nectar feeders have special adaptations to reach into the base of the flower where the nectar is located.

Hummingbirds have long, specially shaped beaks and tongues to reach the nectar. Hovering in the air allows hummingbirds to feed on flowers whose stalks are too weak to support even the tiny weight of the hummingbird.

Nectar-feeding butterflies have a long, hollow feeding tube called a proboscis. These tubes work like a straw to suck nectar out of flowers. When butterflies aren't using their proboscis, they can roll it up and tuck it away.

Moths work the night shift. Many flowers, like Missouri primrose, stay open at night to be pollinated by moths. Some moths feed on pollen. Others feed on nectar. The Hummingbird Clearwing Sphinx moth hovers in front of flowers just like a hummingbird and is often mistaken for one. Look for moths pollinating flowers in the afternoon and evenings.

Want to watch pollinators at work? Now is a good time to put up hummingbird feeders in Missouri. At Rockwoods this month you can learn how to attract butterflies and other critters to your garden. Our outdoor butterfly garden and landscape demonstration area are in full bloom! Come visit for more ideas!

Busch Memorial Conservation Area August A.

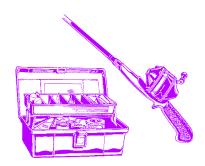

Kids' Fishing is Catching on at Busch

by Rhonda Anderson, Interpretive Programs Supervisor

Hey kids 15 and under, do you want to learn how to fish? Maybe you know how to fish but want to learn how to do it better. Have we got a day just for you! On Saturday, May 19, from 9:00 a.m. to 2:00 p.m. the Busch Conservation Area will be hosting Kids' Fishing Fair on Lakes 1, 2, and 15. Several volunteers will be on hand to help kids 15 and under learn to cast, catch, and land that fish.

Fishing is not the only thing to do at the Kids' Fishing Fair. When you have caught your limit, or Mom and Dad get bored, try visiting some of the hands-on stations we will have set up for the whole family to enjoy:

- -Filleting and Cooking Fish
- -Casting Range
- -Knot Tying and Baiting Hooks
- -Boating Safety
- -Fly Tying and Casting
- -Fish Identification Maze
- -Catch and Release Fishing
- -and more!

If Mom and Dad really want to try fishing themselves, Lakes 3, 4, 5, 7, and 24 will be stocked for the whole family to try fishing. So bring your fishing pole, your favorite adult, and come rain or shine (fish bite better in the rain anyway!) to Kids' Fishing Fair. Hope to see you there!

This event is a combination of the Family Fishing Fair and Kids' Fishing Day

Coming soon!

Women in the Outdoors TM

by the National Wild Turkey Federation Saturday, June 23 at the August A. Busch Memorial Conservation Area 2360 Highway D St. Charles, MO 63304 (636) 441 - 4554

LOCATION:

From Hwy 40, take 94 south to Hwy D; turn west on D for approx. 3 miles. From I-70, take 94/First Capitol exit; turn south on Hwy 94 to Hwy D; turn west on D for approx. 3 miles. The area entrance is on the north side of Hwy D.

HOURS: Area is open from 6 a.m. until 7 p.m. October 1 through March 31. See area regulations for special hunt hours. Fishing hours are 6 a.m. until 6 p.m. October 1 through March 31. Rental boats are available April 1 through September 30 only. Office is open Monday through Friday from 8 a.m. until 5 p.m. and Saturday and Sunday from 8 a.m. until 4 p.m.

ABOUT THE AREA: 6,987 acres with 32 lakes and 40 ponds totaling 526 acres of water for fishing. There are six viewing blinds (two are wheelchair accessible), seven hiking trails totaling 5 miles, picnic area, staffed firearms range, and fishing jetties (some are wheelchair accessible). The area has interpretive programs, exhibits, demonstration sites, and is used by bicyclists.

The Women in the Outdoors program will meet its goal by introducing more women to outdoor activities; training women as outdoor educators and providing a network for men and women with similar interests within our local chapter system. Courses include: Archery, Shotgunning, Outdoor cooking, Turkey hunting, Map and compass, Fly fishing, Plant identification, First aid, Hiking and much more!

The Educators' Niche

by: Dennis Cooke, Outdoor Skills Education Specialist

Word of the month:

Lateral Line (noun). Nerve endings along a row of pores on either side of a fish from gills to tail act as radar, allowing the fish to detect the size, shape, direction and speed of object.

SPRING IS HERE; GO FISH!

Want to take your kids fishing but don't know how or where? Even if you have never been fishing before, our educational materials will give you the background you need to give kids an experience they will always remember.

Publications:

MDC publishes several free brochures about fishing. "An Introduction to Fishing" will introduce you to the basics of fishing for your first fishing trip. Another excellent publication, "Kids Fishing," is an activity book designed to make students aware of the need for clean water, how and where fish

> "Give a [child] a fish, and feed him for a day. Teach a [child] to fish, and feed him for a lifetime." -Chinese Proverb

live and to teach them how to fish responsibly. "Casting Equipment" gives an in-depth explanation of the basic types of freshwater casting equipment to help you get started.

MDC also publishes curricula about fishing. Our Aquatic Resources Education Program includes "Fishing for Answers," which teaches about aquatic ecosystems through fishing. Designed for upper elementary, "Fishing for Answers" comes with a teacher's edition and a classroom set of student guides. Teachers using these curricula are encouraged to take their students fishing as the final lesson. To schedule the Aquatic Resource Education (A.R.E.) lakes at August A Busch Memorial Conservation Area call 636,441,4554.

All of these publications are FREE for Missouri teachers! To request publications, call any MDC office and ask for a

"Conservation Education Materials Request Form" to be sent to you. After you return the completed form, your materials will be sent to you in a timely manner (usually in 2-4 weeks).

Around the town:

Free Fishing Weekend is June 9 & 10, 2001. You can fish anywhere in the state without a permit only on this weekend. During the rest of the year, anyone between the ages of 15 and 65 needs a fishing permit to fish in any public waters in Missouri.

For fish stocking information on lakes in the St. Louis Metro area call 636.441.8014. This hotline is updated when fish stocking occurs in the area. To get a copy of "A Summary of Missouri Fishing Relations," call the St. Louis Regional office at 636.441.4554 or Powder Valley Conservation Nature Center at 314.301.1500.

BUSCH RANGE

Hours for May 2001:

10:00 a.m. - 4:00 p.m. Friday - Monday 10:00 a.m. - 7:30 p.m. Tuesdays Closed Wednesday & Thursday For more information, call 636.441.4554 ext. 251

HENGES RANGE

Hours for May 2001:

2:00 p.m. - 8:00 p.m. Wednesday 10:00 a.m. - 4:00 p.m. Thursday - Sunday Closed Monday, Tuesday, Special Events & Holidays For more information, call 636.938.9548

JAY HENGES SHOOTING **RANGE**

Introduction to trap shooting

9:00 a.m. - 11:00 a.m. Saturday, May 5 Advance registration required, call 314.615.4386 (\$10 registration fee) A new course designed to introduce people to the basics of shotguns and clay targets in a fun and relaxed atmosphere. Fee includes use of shotgun, shotgun shells, safety instruction, tips on shotgun fit and clay targets.

Page 8 Making Tracks May 2001

Wanted: Volunteer Naturalists, con't.

The purpose of the course is to prepare trainees for the diverse job duties of the Volunteer Naturalist. If you have visited any of the Department's interpretive sites in the state, you probably have already met some Volunteer Naturalists. Their training enables them to perform a wide range of jobs. They present and assist with conservation education programs and walks. They answer visitor questions at the reception desk, sell gift shop items, monitor trails, and much more.

The training course will include the "big picture" -- the Conservation Department: its policies, procedures, and organization. Trainees will tour Busch, Rockwoods and Powder Valley. They will be taught techniques to present programs and lead walks. Training will also include information on jobs unique to the each site, such as staffing the reception desk and selling gift shop items. If you are 18 years or older and would like to learn more, you're invited to attend one of the following information sessions:

- Thursday, September 6, 7:00 9:00 p.m. at Powder Valley Conservation Nature Center. For more information call Cindy Bruns, 314.301.1500 x 2238
- Thursday, September 6, 7:00 9:00 p.m. at August A. Busch Conservation Area. For more information call Rhonda Anderson, $636.441.4554 \times 244$
- Thursday, September 6, 7:00 9:00 p.m. at Rockwoods Reservation. For more information call Tom Meister, 636.458.2236

Note: Please call the site you are interested in to register.

We look forward to seeing you!
